PREVENTIVE VISIT

PROBLEM ARISES

PREVENTIVE & OFFICE VISIT

When the new or existing health problem is identified and addressed during a preventive health care visit, a separate office visit will be billed as required by national coding and billing guidelines, our office follows these guidelines and will bill for one preventive care visit and a second office visit for the new or existing health problem. As a result, your insurance company may charge you for two separate visits.

Our goal has always been to provide convenience to our patients so we have longer appointment times for annual visits to address your health care problems and save you time from having to come back for the second office visit. If you have any questions please contact us anytime at (513)-871-0684.
